**Problem Solving:** Solved 100+ problems on **LeetCode** (**DSA & algorithms**)

## COURSEWORK / SKILLS

**Soft Skills:** Collaboration, Public Speaking, Problem-Solving, Adaptability

**Subjects:** Data Structures & Algorithms, Operating System, DBMS, Artificial Intelligence

## PROJECTS

**GoLocal** | Java, SpringBoot, MySQL, JavaScript, ReactJS

- Developed a shop listing and search platform allowing users to search for shops and sellers to list their businesses to reduce the gap between local retailers and increase foot traffic.
- Built a secure backend with **Spring Boot** and **REST APIs** for managing shop and user data stored in MySQL.
- Created a dynamic frontend with React, responsive design, and seller functionalities.

**Lost and Found** | Java, SpringBoot, MySQL, JavaScript, ReactJS                    **Mar 2025**

- Developed a Lost & Found platform for students to list found items and claim lost belongings through verification questions.
- Designed a responsive, intuitive interface ensuring smooth and user-friendly experience.
- Enhanced **campus trust and accountability**, reduced lost item incidents, and provided a secure and structured way to return items to rightful owners.

## INTERNSHIP

| | |
|---|---|
| **Datacode** | **Aug 2025 - Sept 2025** |
| *Frontend Developer* | *Remote* |

- Developed component-based architecture and created multifunctional, responsive web pages using **React.js** and **Tailwind CSS**.
- Implemented responsive design principles to ensure compatibility across devices, enhancing user experience.
- Improved website performance by **optimizing code**, ensuring fast load times, and adhering to best practices for frontend development.

## CERTIFICATIONS

- Azure AI Fundamentals - Microsoft
- Core & Advanced Java - YpSilon Technologies
- E-Commerce using React & JavaScript - Udemy
- Agile Project Management - HP Life

## EXTRA CURRICULAR

- **Meritorious Student 2024** - Piramal Pharma Solution
- Co-Founder and Volunteer of the **GRID** community on campus.
